

Motion Detection and Email notification- User Manual

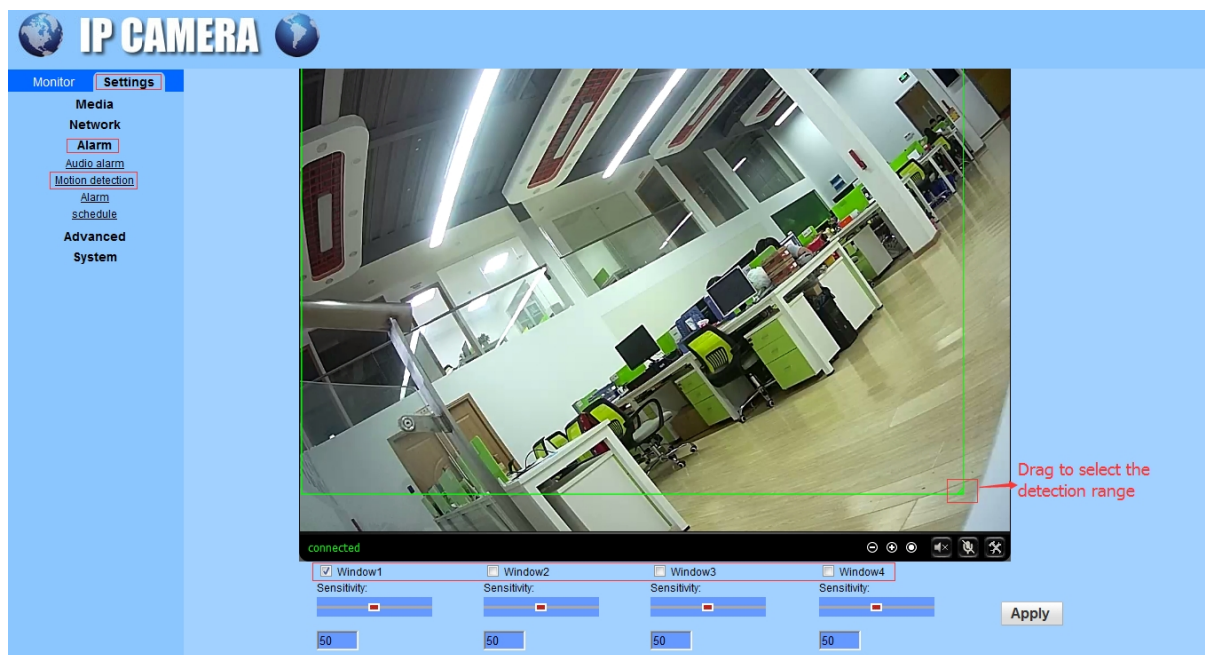

The setting can also be operated on Chrome and firefox, but it requires to open Alarm setting firstly on app. So we suggest you set it up directly on IE

Setup Motion Detection(Suggest set up on IE)

Go to IE interface (For how to log into IE, you can download Search Tool User Manual)

1. Set up motion detection range (Settings → Alarm→Motion Detection)

Here you can set up motion detection range

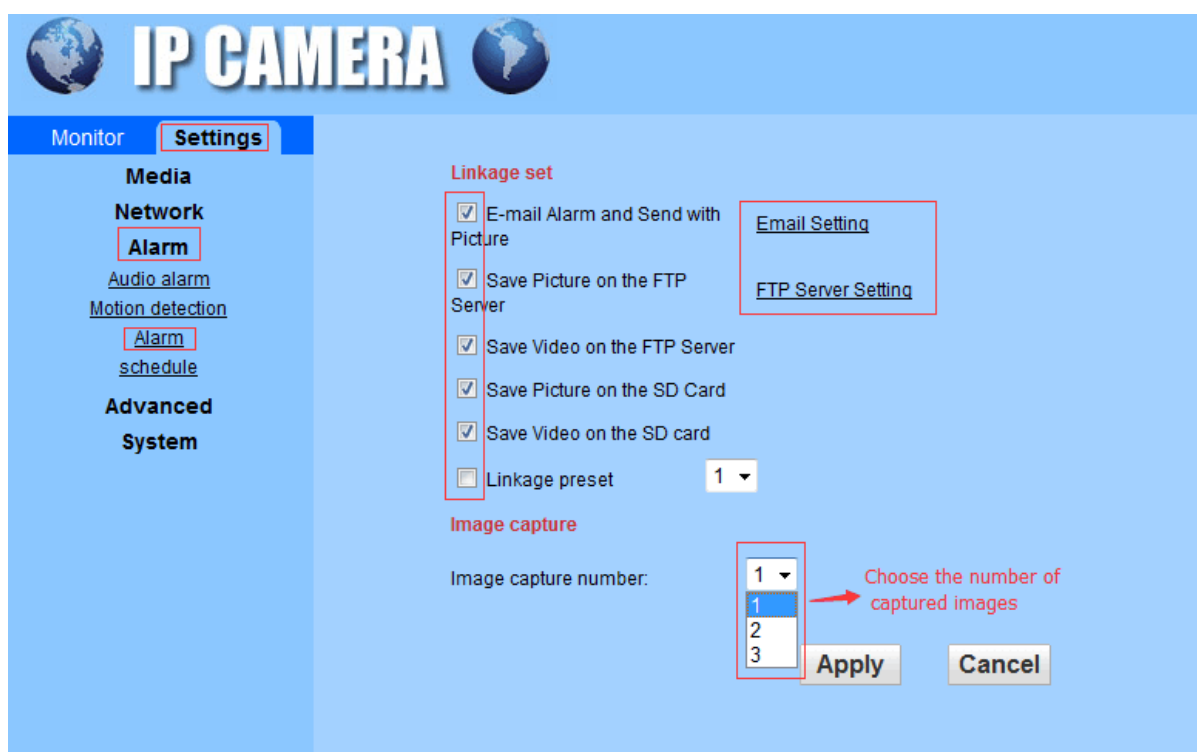

Windows: Check window 1 and a small frame appear,drag to select the detection range.

PS: Check window 2.3.4 to combine detection areas freely

Sensitivity: Modify the motion detection sensitivity

Please click “Apply” after set it up.

2. Email notification (Settings → Alarm→Alarm)

Linkage set

E-mail Alarm and Send with picture: You can choose to send pictures with email alarm

Save Picture on the FTP Server: You can choose to send pictures with FTP alarm

Save Video on the FTP Server: You can choose to send Video with FTP alarm

Note: The option takes effect only when SD card is inserted and the option “Save video on the SD card” is checked.

Save Picture on the SD Card: You can choose to save alarm picture to the SD card (The camera must be inserted with SD card)

Note: Snapshot can not be seen on phone app. It is available on browser. Clicking the SD card on setting main page to download.

Save Video on the SD card: You can choose to save Alarm Video to the SD card(The camera must be inserted with SD card)

Linkage preset: Motion detection preset(Public 8 presets) This is for PTZ camera.

Image capture number: Choose the number of captured images

2.1 Set up Email Notification (Settings→Alarm→Alarm→Email Setting)
