1. About camera

1.1 Product should contain:

IP Camera * 1  Power adapter * 1
User manual * 1  Network cable * 1
Screws bag * 1

1.2 Product interface.

Reset Button
Power
RJ45 Interface

1.3 How to fit Waterproof lid.
2. Connect camera

2.1 Connect network cable to router and plug in power adapter.

The router must be able to connect to the Internet!
Please use the standard power supply.

2.2 Connect LAN cable and power to camera, it needs about one minute to self checking and then start working.

Network indicator light (green): always flashing means network data transmission is normal.
2.3 Two-ways Connect Camera

1) Use POE Switch for power supply

![Diagram of POE Switch connection]

POE IP Camera → SV3C POE Switch → NVR

2) Use Power Adapter for power supply

![Diagram of Power Adapter connection]

Power Supply → IP Camera → Router → PC/Laptop → Mobile Phone

Note:

This is a POE(Power Over Ethernet) Camera:

There are two types of charging with the POE camera.
1. Single cat5 cable for both Power and Data transmission, no need power adapter. (It requires a separate PoE Injector or PoE Switch (both not included).)
2. There are three types of Poe power supply on the market, 48V, 24V, 12V. Our poe cameras are using the standard Poe type: 48V Poe power supply. Its security level is higher than the other two.
The POE function of our camera can work with 48V POE switch with IEEE 802.3af.
3. View via mobile phone

3.1 Download “CamHi” from Google Play (Andriod Phone) / App Store (Iphone) or scan the QR code below to get APP information.
